Dhanya Sukanth B.K.

Bengaluru, KA, 560079 | +91-9019671066 | dhanyasukanth@gmail.com

CAREER SUMMARY

Senior Cloud Engineer supporting global GE MyApps infrastructure across Azure and AWS environments. Experience in Ubuntu server administration, production patching, monitoring, LDAP support, proxy troubleshooting, ServiceNow operations, and infrastructure provisioning using Terraform. Focused on operational stability, SLA-driven service management, and secure infrastructure operations.

SKILLS

- **Operating Systems:** Ubuntu (Linux Server Administration), Windows (basics)
- **Cloud & Infrastructure:** Microsoft Azure, AWS, Terraform, Grafana, Prometheus, OpenSearch, AWS CloudWatch
- **Identity & Access Support:** LDAP query support, Server checks, Access validation, Authentication troubleshooting
- **Networking & Proxy:** Zscaler troubleshooting, URL policy administration (Zscaler / Private PZEN), DNS validation, VPN management, Proxy configuration
- **Scripting:** Shell scripting, PowerShell (basics), Python
- **IT Service Management:** ServiceNow (incident/change/problem/request handling), ITIL, SLA tracking, Process compliance auditing, Documentation
- **Debugging & Tools:** Wireshark, Fiddler, HAR analysis

WORK EXPERIENCE

Senior Engineer – Cloud **MAR 2024 – Present**
Microland Pvt. Ltd | Bengaluru

• Supporting global enterprise infrastructure and service operations for GE businesses (GEHC, GEAS, GEVN, GECorp) and maintaining the MyApps product used across client teams.
• Performing server health checks, production and staging patching (Azure), updates, security fixes, and performance optimization by removing unused resources.
• Using ServiceNow daily for incident, change, problem, and request handling in SLA-driven environments, including configuration-level activities such as editing forms, updating fields, assignment rules, and workflow adjustments.
• Coordinating with internal teams, L4 advisors, and client stakeholders to drive issue resolution and maintain service quality.
• Monitoring cloud and on-prem systems using Grafana, Prometheus, OpenSearch, and AWS CloudWatch with alerting and dashboards for proactive issue detection.
• Provisioning infrastructure components using Terraform.

- Supporting LDAP-related queries and performing server-side validations.
- Troubleshooting Zscaler proxy issues and managing URL classification policies (Zscaler / Private PZEN).
- Validating DNS configurations and coordinating with DNS teams for domain setup and resolution issues.
- Managing VPN connectivity and proxy configurations.
- Handling escalations and client communications with clear SLA ownership.
- Auditing ServiceNow incidents, changes, and requests to ensure data accuracy and compliance.
- Troubleshooting application, system, and network issues using logs, Wireshark, Fiddler, and HAR files.
- Creating and maintaining documentation and knowledge articles to support L1/L2 teams.

IOT Engineer **DEC 2023 – APRIL 2024**
Knowx Solutions Ltd | Bengaluru

Gained valuable experience in embedded systems development using C and Python, working with IoT platforms such as AWS IoT Core, MQTT, and Blynk. Focused on designing and developing solutions based on client requirements, ensuring that the end products met their needs and were delivered on time.

EDUCATION

Visvesvaraya Technological University [VTU], Bengaluru
Bachelor of Engineering (B.E.) - Electronics and communication Aug 2019 - June 2023

CERTIFICATION

AWS Certified Cloud Practitioner (CLF -02)
Microsoft Azure Fundamentals (AZ-900)
HashiCorp Certified: Terraform Associate -004
